

RAVI YADAV

AI Developer | Machine Learning, NLP & Generative AI Engineer

raviyadav68358@gmail.com | +91 96548 12921 | Gurugram, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI Developer and Machine Learning Engineer with 2 years 11 months of experience across Generative AI, NLP, automation, and data engineering. Skilled in building LLM-powered solutions, custom GPTs, and RAG pipelines, and in automating end-to-end workflows with Python, FastAPI, and n8n. Strong foundation in NLP, deep learning, and computer vision, backed by hands-on PostgreSQL, data modeling, and Azure data-pipeline experience. Passionate about applying Generative AI and ML to accelerate decision-making and operational efficiency.

WORK EXPERIENCE

AI Developer | Everest Group

Gurugram, India | Jul 2025 – Present

- Built 5+ custom GPTs and LLM-powered assistants that accelerated internal research, content generation, and operational workflows, cutting manual turnaround on repetitive knowledge tasks by ~40%.
- Engineered an automated PowerPoint generation pipeline (Python, Salesforce, Zoho) for client decks, reducing preparation from 2–3 hours to minutes across ~50 decks per month and freeing 100+ hours of analyst effort monthly.
- Automated business workflows with Python and FastAPI, including a .msg email-validation service that flags salutation-recipient mismatches and a Playbook generator that cut a 3-day manual process by ~1.5 days per request.
- Designed automation flows in n8n (with JavaScript) for Marketo duplicate detection and CRM data synchronization, and built VBA-based Excel diagnostic and benchmarking tools adopted across multiple internal teams.
- Building Azure Data Factory CI/CD pipelines (POC) across multiple environments and Excel-to-PostgreSQL ingestion pipelines that standardize 3+ source formats, with reusable PostgreSQL stored procedures running 6+ automated data-quality checks (null, duplicate, orphan-record, and integrity validation) across 3 severity levels.

Associate Development Engineer | Avizva Solutions Pvt. Ltd.

Gurugram, India | Jul 2023 – May 2025

- Designed 10+ normalized ERDs and revamped indexing strategies and stored procedures, improving data-retrieval speeds by up to 30% and strengthening consistency across reporting dashboards.
- Built Python and AWS automation for data purging and archiving (70% less manual effort) and optimized complex MongoDB aggregation queries for Elasticsearch within Agile workflows (Jira, Bitbucket, Confluence).

Machine Learning Intern | AIW – Artificially Intelligent Workforce

Delhi, India | Jan 2023 – Jul 2023

- Engineered and deployed ML models, NLP algorithms, OCR, and computer-vision solutions that improved medical-claim processing efficiency by 40% and accuracy by 35%.
- Led a cross-functional team of 10–12, defining goals and timelines and enforcing 100% data-privacy and AI compliance while reducing project bottlenecks by 30%.

Machine Learning Intern | Xebia

Remote | Jul 2022 – Aug 2022

- Built and fine-tuned ML classification models (84% accuracy) and integrated transfer-learning models (BERT, RoBERTa), improving text-classification accuracy by 20%.

SKILLS

Languages & Databases: Python, SQL (Joins, Aggregations, Window Functions, CTEs, Subqueries), PostgreSQL, MongoDB, VBA, C
AI & ML: Machine Learning, NLP, Generative AI, LLMs, RAG, Deep Learning, OCR, Computer Vision, Transfer Learning (BERT, RoBERTa)
Automation & Data: Workflow Automation, Custom GPTs, FastAPI, n8n, Azure Data Factory, ETL / Data Pipelines, Data Migration, Salesforce (basic querying), PySpark
Visualization & Frameworks: Pandas, Matplotlib, Seaborn, Power BI, TensorFlow, LangChain, Streamlit, OpenAI
Platforms & DevOps: Git, GitHub, Bitbucket, Jenkins, Azure, AWS, Linux, Jira, Confluence

PROJECTS

HR Policy Chatbot — Python, LangChain, RAG, Vector DB, Streamlit

[Link](#)

- Built a RAG-based HR policy chatbot using an open-source LLM and Chroma vector database, improving answer accuracy and lowering inference cost, with a Streamlit UI for self-service policy retrieval and HR escalation.

Fake News Classifier — Python, TensorFlow, GRU/LSTM, Word Embeddings, Streamlit

[Link](#)

- Implemented an end-to-end NLP classifier with tokenization and lemmatization preprocessing, deployed via Streamlit for real-time inference.

EDUCATION

Manav Rachna University — B.Tech, Data Science & Machine Learning | CGPA: 9.61

Haryana, India | Jul 2019 – Jul 2023

PUBLICATION & CERTIFICATIONS

Publication: Forecasting Cryptocurrency Prices using Sequential and Time-Series Models. | [Link](#)

Certifications: Microsoft Azure AI Fundamentals (AI-900) · NLP in TensorFlow (Coursera) · PostgreSQL Bootcamp (Udemy) · DSA in Python (Coding Ninjas).
